

React.js Developer with 4+ years of experience building scalable web applications using React, Next.js, TypeScript, and modern frontend architectures. Experienced in performance optimization, state management, reusable component design, and enterprise applications serving 20,000+ users.

SKILLS

Languages & Frameworks	React, Next.js, TypeScript, JavaScript, Angular, jQuery
State Management	Redux Toolkit, React Query
UI Libraries	Material UI, Tailwind CSS, Bootstrap
Styling	HTML, CSS, SASS, SCSS, Flexbox, CSS Grid
API Integration	REST APIs, Axios
Performance	Lazy Loading, Code Splitting, Memoization
DevOps (Basic)	CI/CD
Design Tools	Figma, Canva
Version Control	Git, GitHub, Bitbucket, Azure DevOps

WORK EXPERIENCE

Frontend Developer03/2025 — Present

Boston Institute of Analytics

- Built a Student Management Portal from scratch, currently serving 20,000+ users across Student, Admin, and Academic roles.
- Built the portal using React and Next.js with Server-Side Rendering (SSR), improving initial load performance and delivering a scalable, maintainable frontend architecture.
- Implemented role-based access control with protected routes and authentication covering 3 user types — ensuring secure, role-specific experiences.
- Delivered production features including pagination, skeleton loaders, file uploads, and rich text editors (Tiptap, Monaco) with Formik/Yup validation and Axios API integration.
- Managed state using Redux Toolkit and local state strategically, avoiding unnecessary re-renders and keeping data flow clean.
- Improved overall workflow efficiency by 30% through optimized component architecture, smart state management, and reusable UI patterns.

Frontend Developer09/2024 — 03/2025

Idealake Information Technologies Pvt. Ltd

- Contributed to Tamarind Astra from scratch — built 30+ pages including authentication flows (sign-in, sign-up, forgot/reset password) and complex multi-form modules.
- Built a custom Material UI theme from scratch, ensuring consistent design language across the entire application.
- Handled large-scale form management using Formik and Yup across 30+ pages, covering validation, error states, and clean data submission flows.

Frontend Developer04/2022 — 08/2024

Ebrandz LLP

- Developed scalable frontend applications using TypeScript, component-based architecture, and REST API integrations.
- Designed and maintained reusable UI components and shared modules, improving development efficiency and application consistency.
- Implemented performance optimization techniques including lazy loading, route-level code splitting, and asset optimization.
- Built responsive and cross-browser compatible user interfaces using modern frontend development practices.

KEY DELIVERABLE / ACHIEVEMENTS

- Delivered production UI for multiple projects including CRM, Ecommerce, and Student Portal — independently handling design decisions from scratch for the Student Portal serving 20,000+ users.
- Reduced UI bugs by 35% and improved workflow efficiency by 30% through reusable component patterns and smart state management.
- Scaled apps from 0 to 20,000+ users by maintaining clean, performant code with lazy loading, memoization, and code splitting.
- Managed 30+ form-heavy pages with complex validation using Formik, Yup, and framework-specific form libraries — achieving zero reported data submission issues post-launch.
- Improved page load performance for 1,000+ users through CDN-based image optimization and asset compression.

EDUCATION

Bachelor of Science in Information Technology, Niranjana College of Commerce	05/2019
Higher Secondary Certificate (HSC), Sanskardham Junior College of Science	04/2016
Secondary School Certificate (SSC), Saroja Devi School	03/2014
